sarkarsayak15@gmail.com | (+91) 877-745-8286

LinkedIn /sayak-sarkar

## Skills

- Programming Languages: C, **C++**, **Java,** Python.
- Other Languages & Skills:
  - **Full Stack Web Development(Frontend & Backend):** HTML, CSS, Tailwind CSS, JS, TypeScript, Node JS, locomotive JS, Django, REST APIs, MERN Stack.
  - **Database Handling:** MySQL, DB Browser for SQLite, MongoDB.
  - **Version Control System, IDE & Softwares:** Git, GitHub, VS Code, Colab.
  - **AI & Machine Learning:** Deep Learning, Gen-AI, NumPy, Pandas, Scikit-learn, Tensorflow.
  - **Other Core CS Subjects:** DBMS, OOPs, OS, DSA.

## Education Details

- B.Tech in CSE | Narula Institute of Technology, Kolkata — *(CGPA: 8.6 (Upto 6th sem) | Aug '23 - Jul '27)*
- XII(WBCHSE) | Gobardanga Khantura High School — *77.8% | 2023*
- X(WBBSE) | Gobardanga Khantura High School — *84.14% | 2021*

## Projects Undertaken

### CellScope - Breast Cancer Prediction System

- Developed a '**Breast Cancer Prediction System**' webapp using deep learning and machine learning with **LR-Meta Stacking** ensemble model, achieving an overall **99% test accuracy, 100% test precision and 98% recall** and it is evaluated on **Wisconsin Diagnostic Breast Cancer dataset** of 569 rows and 30 features.
- Combined supervised and unsupervised learning through ML pipeline for better throughput, using **PCA** for dimensionality reduction and **K-Means clustering** to improve efficiency and model performance.
- Built a stacking ensemble of **Gradient Boosting**, **XGBoost**, **CatBoost**, **LightGBM**, Logistic Regression, Decision Tree, SVM and ANN.
- Built a **React (TypeScript)** frontend with a **FastAPI** backend serving the stacked model with **PostgreSQL** database for storage purpose.
- Deployed and hosted the frontend and backend part of the webapp on **Vercel** and database part on **Neon** - https://cellscope-nu.vercel.app/.

### Democamp - Online Sports Club Admission cum Shop (Django)

- Developed an '**online e-commerce based web-application for admission in sports club cum sports shop**' website named **Democamp** with login page and registration page template for user(Player and Coach both) using languages like 'HTML', 'CSS', 'Bootstrap CSS', 'JavaScript', '**Django** framework' etc and also added paytm payment gateway with the sports shop.
- Implemented backend including **authentication**, showcasing **CRUD operation** to create the custom admin panel also and maintained **SQLite** database(managed via **DB Browser for SQLite**).
- My Github Repo. - https://github.com/sayakk-19/Democamp.

## Certifications

- **Industry Training**: Artificial Intelligence & Machine Learning using **Python**, Euphoria GenX | Jan 2026 – Mar 2026.

## Achievements

- **Finalist at IceBreaker5 Coding Contest (HIT College)**:
  - Placed in the top 100 finalists among thousands of participants by solving complex algorithmic challenges involving arrays, trees and graphs.
  - Participated in the final and solved 3 out of 5 problems.

## Hobbies

- Having a huge interest in **algorithmic problem solving**(coding) over different coding platforms like leetcode, geeksforgeeks. Here is my leetcode profile link - https://leetcode.com/u/sayakk_19/.
- Passionate about playing and watching football.
- Drawing is my another hobby.
